

TAKING IT ON THE ROAD.

Contech's web site features an extensive resource library that provides assets such as tech sheets, CAD drawings, instruction brochures, industry links, and more. Customers love it. Problem is, the people who use it most, engineers and developers, often work at construction sites with no Internet access. To give them the resources when they're on-site, we created this CD-ROM-based Resource Manual that offers the same assets as the web site, but in a more portable format. Down the road, Contech can easily update the assets by simply editing the XML database and burning new, pre-printed CD-ROMs before inserting them into the pre-printed package.

So, next time you're looking for a creative promotion to support your marketing or brand strategy, give us a call. We have the creative horsepower and innovative products that are sure to meet your needs.
